Experience

AUGUST 2021 - PRESENT

Iron Galaxy Studios - *Mid-Level Software Engineer*

MAY 2019 - AUGUST 2020

Northrop Grumman - *Assoc. Software Development Analyst*

MAY 2018 - MAY 2019

University of Central Florida - *Undergraduate Researcher*

Projects

Unannounced Third-Person Shooter (PS5, PC)

- Designed flanking behaviors for enemy AI using Behavior Trees, EQS, and C++ classes.
- Engineered a system for allowing friendly AI to perform stealth takedowns on enemy AI.

Tony Hawk 3+4 (Switch 2)

- Added Switch 2 support for backend platform service (Demonware) and Playfab Voice Chat.
- Resolved platform-specific integrations, including GameChat, NSO, and Profile UI.

Interactive Shooter Attraction (Universal Studios)

- Configured boss power-ups and seasonal skins by wiring textures, VFX, and ammo types to a data table-driven system for runtime variant selection.
- Architected Player State Service (PSS) to transfer player state across distributed game instances and add redundancy for crashes.
- Synchronized in-attraction session data with the mobile app to tie player actions to rewards.

Auto-Battler Prototype (Mobile, PC)

- Developed player navigation and loot distribution systems, accounting for client-server replication.

VALORANT

- Resolved timing and edge-case bugs between ability activation and UI state for new platforms.

Rumbleverse (Xbox One/Series X, PS4/5, PC)

- Fixed and improved UI systems, including battle pass, character customization, and player cards.
- Extended an in-house UI framework with an async asset loading API, exposing success/failure callbacks and a simplified image-loading interface for designer use.

Zenko: A Fox's Tale (Capstone Project)

- Built core movement mechanics (dash, pounce) and implemented destructible platforming objects that could be rebuilt at runtime.
- Used GameAnalytics to analyze playtest data and inform gameplay iteration and balancing.

Education

MAY 2019

University of Central Florida - *B.S. in Computer Science, Minor in Digital Media*

AUGUST 2021

Florida Interactive Entertainment Academy - *M.S. in Interactive Entertainment, Programming Track*

Skills

- C++, C#, Python
- UE 4/5, Perforce, Visual Studio, Jira/Confluence, Unity
- Blueprints, AI Systems (Behavior Trees, EQS, Blackboard), Replication, UMG, Unreal Insights
- Technical Documentation, Code Reviews, Cross-Discipline Collaboration
